EDUCATION

B.E - CSE

RVS College Of Engineering and
Technology
[8.7 / 10] CGPA
2024 - 2028

SKILLS

- Web Development
- Strong database management
- Continuous integration
- Problem solving
- Multitasking
- Team Collaboration
- Time management
- Friendly, positive attitude

LANGUAGES

English (Fluent)
Tamil (Bilingual)
Japanese (Elementary)

CERTIFICATION

- 2026 - 06 Full Stack Developer
- 2025 - 11 Data Science

SUMMARY

I am a B.E. Computer Science and Engineering student at RVS College of Engineering and Technology with a strong interest in Full Stack Development and Artificial Intelligence. I enjoy learning new technologies and applying them to solve real-world problems through projects and practical experience. I am continuously improving my technical and problem-solving skills while preparing for opportunities in the software industry.

EXPERIENCE

Data Science Intern, SkillSync

June 2026 - July 2026

- Performed data preprocessing, cleaning, and EDA on datasets.
- Developed regression models using Linear Regression, Decision Tree, and Random forest.
- Gained practical experience in data science and machine learning workflows.

Project Lead

September 2025 - Current

- Led and coordinated a team throughout the project development lifecycle.
- Contributed to technical decisions, problem - solving and project implementation.
- Coordinated the final project presentation and demonstration.

Internship Coordinator

June 2025 - Current

- Coordinated internship placements, ensuring alignment with student career goals and employer needs.
- Developed and maintained relationships with local businesses to enhance internships opportunities.
- Reviewed resumes and cover letters, providing constructive feedback to enhance student applications.

PROJECTS

Title : UyirNila – AI-Powered Women’s Health Companion (Web App)

- Designed the application to track and analyze women’s health patterns.
- Implemented features such as cycle tracking, mood analysis, and AI-based health suggestions.
- Developed a rule-based AI system to provide personalized recommendations based on user inputs.
- Deployed the application using Netlify for online accessibility.
- Live Demo: <https://uyirnila.netlify.app/>

Title : NeuroAI – AI-based System for Early Neurological Risk Prediction using OS-level Typing Analytics

- Published in NCRCTIT’26 Conference Proceedings
- RVS Technical Campus, Coimbatore | March 12, 2026
- ISBN: 978-81-999288-7-9
